How to combine the elegance of a serif font with the sturdiness of a sans-serif? It took me three years to find my answer. Quaria's DNA combines opposites, drawing from the rich pool of typographic elements from the last 200 years without dedicating itself to a specific era. It is a modern hybrid that can be both elegant and powerful, Sans and Serif.

Earth is the
 third planet
 from the
 Sun.

22/25 pt

Earth is the third planet
 from the Sun and the
 only astronomical object
 known to harbor life.

12/15 pt

Earth is the third planet from the Sun and
 the only astronomical object known to
 harbor life. While large volumes of water
 can be found throughout the Solar System,
 only Earth sustains liquid surface water.
 About 71% of Earth's surface is made up of
 the ocean, dwarfing Earth's polar ice, lakes,
 and rivers. The remaining 29% of Earth's
 surface is land, consisting of continents

A32 offers you an extraordinary living experience in an exclusive surrounding. From the imposing entrance to the lush garden area, everything has been thought out down to the smallest detail. Choose from among 24 great apartments with living areas of approx. 35 to 160 m² and enjoy the best living comfort.

- ▶ Modern architecture, well-thought-out floor plans, high ceilings, spacious terraces and balconies, exclusive materials, and an individual approach to your needs.

BA

THE SUBTLE ART OF NOT GIVING A F*CK

I

Like most of Kafka's works, *Metamorphosis* tends to be given a religious (Max Brod) or psychological interpretation by most of its interpreters. It has been particularly common to read the story as an expression of Kafka's father complex, as was first done by Charles Neider in his *The Frozen Sea: A Study of Franz Kafka* (1948). Besides the psychological approach, interpretations focusing on sociological aspects, which see the Samsa family as a portrayal of general social circumstances, have also gained a large following.

Vladimir Nabokov rejected such interpretations, noting that they do not live up to Kafka's art. He instead chose an interpretation guided by the artistic detail, but categorically excluded any attempts at deciphering a symbolic or allegoric level of meaning. Arguing against the popular father-complex theory, he observed that it is the sister more than the father who should be considered the cruelest person in the story, since she is the one backstabbing Gregor. In Nabokov's view, the central narrative theme is the artist's struggle for existence in a society replete with philistines that destroys him step by step. Commenting on Kafka's style he writes: "The transparency of his style underlines the dark richness of

his fantasy world. Contrast and uniformity, style and the depicted, portrayal and fable are seamlessly intertwined". In 1989, Nina Pelikan Straus wrote a feminist interpretation of *Metamorphosis*, bringing to the forefront the transformation of the main character, Gregor's sister, Grete, and foregrounding the family and, particularly, the younger sister's transformation in the story. According to Straus, critics of *Metamorphosis* have underplayed the fact that the story is not only about Gregor but also about his family and especially about Grete's metamorphosis since it is mainly Grete, as woman, daughter and sister, on whom the social and psychoanalytic resonances of the text depend.

II

In 1999, Gerhard Rieck pointed out that Gregor and his sister, Grete, form a pair, which is typical of many of Kafka's texts: it is made up of one passive, rather austere, person and another active, more libidinal, person. The appearance of figures with such almost irreconcilable personalities who form couples in Kafka's works has been evident since he wrote his short story "Description of a Struggle" (e.g. the narrator/young man and his "acquaintance"). They also appear in "The Judgment" (Georg and his friend in Russia), in all three of his novels (e.g. Robinson
