The early years of the 19th century were a time of restlessness. In the midst of this revolutionary era, new typefaces emerged that were breaking from the norm and whose sole purpose was to attract attention. Kreol builds on this and bridges the gap between tradition and modernity. It is a refined and contemporary interpretation of an evergreen.

Earth is the third planet from the Sun.

22/25 pt

Earth is the third planet from the Sun and the only astronomical object known to harbor life.

12/15 pt

Earth is the third planet from the Sun and the only astronomical object known to harbor life. While large volumes of water can be found throughout the Solar System, only Earth sustains liquid surface water. About 71% of Earth's surface is made up of the ocean, dwarfing Earth's polar ice, lakes, and rivers. The remaining 29% of Earth's surface is land, consisting of continents

To say a grid is limiting is to say that language is limiting, or typography is limiting.

— Ellen Lupton

To say a grid is limiting is to say that language is limiting, or typography is limiting.

— Ellen Lupton

# WIENER OPERNHAUS

I

Roderigo, a wealthy and dissolute gentleman, complains to his friend Iago, an ensign, that Iago has not told him about the secret marriage between Desdemona and the young Othello.

II

The party arrives in Cyprus to find that a storm has destroyed the Turkish fleet. Othello orders a general celebration and leaves to consummate his marriage with Desdemona.

OTHELLO  
27 MAY 2024

Albert Einstein was a German-born theoretical physicist, widely acknowledged to be one of *the greatest and most influential physicists* of all time.

Einstein is best known for developing the theory of relativity, but he also made important contributions to the development of the theory of quantum mechanics. Relativity and quantum mechanics are together the two pillars of modern physics. His mass-energy equivalence formula  $E=mc^2$ , which arises from relativity theory, has been dubbed "the world's most famous equation".

His work is also known for its influence on the philosophy of science. He received the 1921 Nobel Prize in Physics "for his services to theoretical physics, and especially for his discovery of the law of the photoelectric effect" a pivotal step in the development of quantum theory. His intellectu-

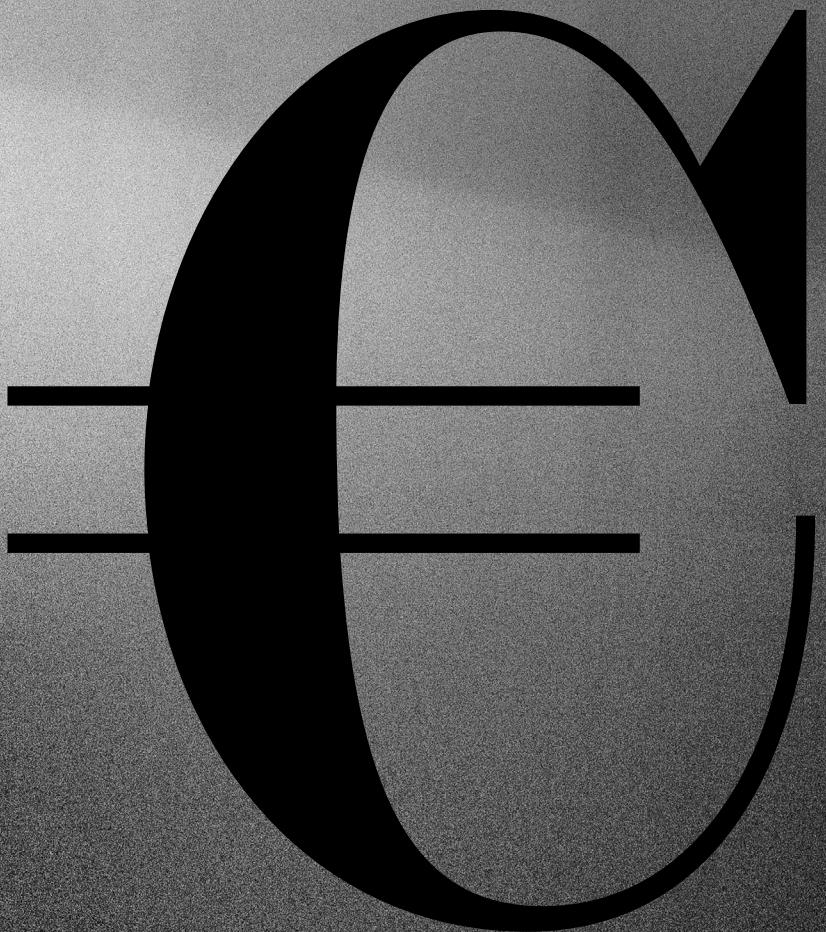

al achievements and originality resulted in "Einstein" becoming synonymous with "genius". In 1905, a year sometimes described as his annus mirabilis ('miracle year'), Einstein published four groundbreaking papers. These outlined the theory of the photoelectric effect, explained Brownian motion, introduced special relativity, and demonstrated mass-energy equivalence.

Einstein thought that the laws of classical mechanics could no longer be reconciled with those of the electromagnetic field, which led him to develop his special theory of relativity. He then extended the theory to gravitational fields; he published a paper on general relativity in 1916, introducing his theory of gravitation.

In 1917, he applied the general theory of relativity to model the structure of the universe. He continued to deal with problems of statistical mechanics and quantum theory, which led to his explanations of particle theory and the motion of molecules. He also

## About

Studio Rene Bieder is the type design practice of Berlin based type designer Rene Bieder. I create retail and custom typefaces that combine functionality with a timeless aesthetic.

## Services

- Retail fonts
- Custom fonts
- Font modifications
- Language extensions
- Logo refinements

Studio René Bieder  
Eisenacher Str. 30  
10781 Berlin, Germany
